I think there is a bug with waypoints and sharp bends indications

I have this course created in Garmin Connect that has two waypoints called "Merca" and "Castros":

https://connect.garmin.com/modern/course/29300599

The course is sent to the Garmin Edge 830 through the Garmin Connect application.

When I load the course, this is what happens:

MONTAÑA

A-Prueba
39.6 km          2:28:21

Castros-Alongos
42.8 km          2:22:28

Castros50k
51.3 km          3:12:03

Curro
3.70 km          5:05:05

Navigation -> Courses -> Saved Courses

In this screen I have disabled "Turn Guidance"  (Indic giros)

**Course Options**

Map

Sharp Bend Warnings
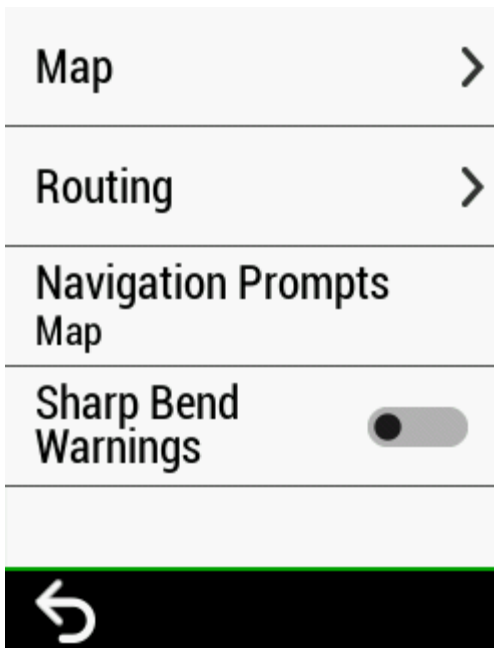

I select the course A-Prueba and "Ride"
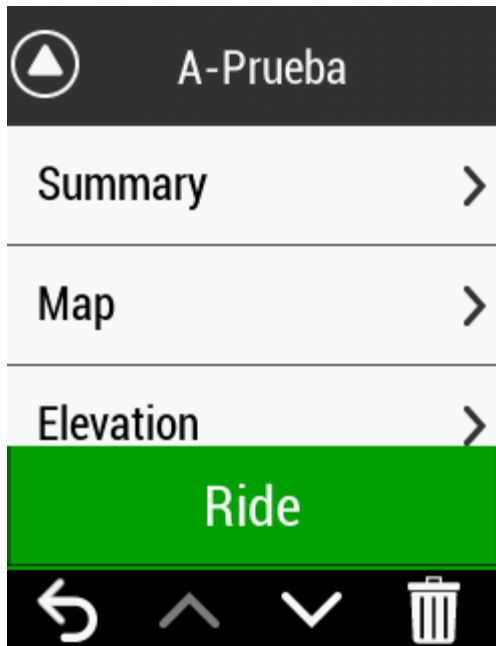

Explore the screens on the Edge.
The course on the map has a lot of arrows, that seems to indicate the place of the sharp bends, but they are sent as waypoints too.

Following the course appears a new data page with the list of all the waypoints (or the sharp bends), the same arrows as the map.
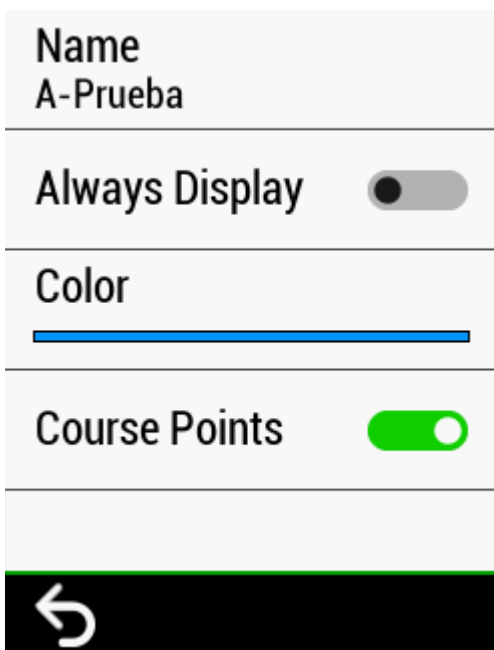

↗ 103m          00:23

↰ 161m          00:36

↱ 262m          00:58

───── End ─────
▨ 40km        02:28:21

∧  ∨

You have to scroll some times to see the real waypoint "Merca" and its references of time and distance.

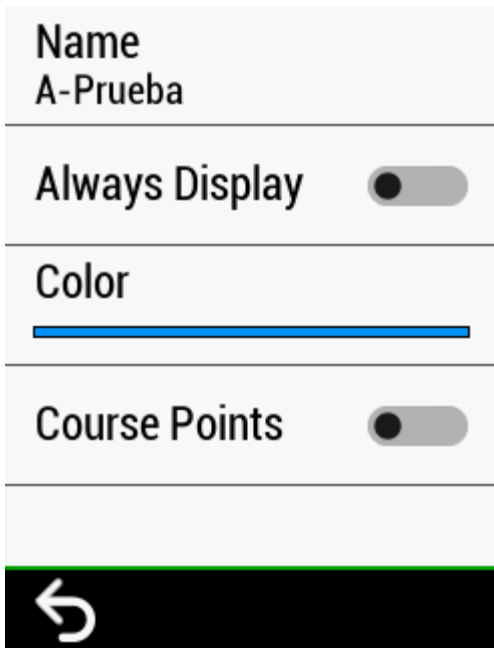

↱ 16km        01:00:27

Merca
▲ 16km        01:00:32

↱ 17km        01:02:54

───── End ─────
▨ 40km        02:28:21

∧  ∨

The option Course Points is enabled:

If I disable Course Points:

There is no trace of the arrows but neither of my waypoints

Having Course Points disabled it doesn't appears the last data page with the list of all the waypoints.

I think there is a bug in the treatment of waypoints and sharp bends.
